>BIOGRAPHY

I started out doing QA testing for a .NET/Oracle application in 2007. I was taken on as a founding member of that organisation's first Project team in 2008, with the task of researching and undertaking any technology-centric projects the company wished to push ahead with. Subsequently, I have:

+ deployed applications in Access VBA for data processing
+ written Government specifications for flat & XML formats
+ revolutionised the company's statistics systems by scrapping legacy Excel sheets in favour of a SQL / Javascript reporting engine
+ procured Cloud web services for new company web applications that I coded.
+ started the process of running automated Unit Testing into company applications
+ started the process of moving libraries of code and company assets into GitHub for source control.

Never one to stand still, I'm excited about the world of technology and constant innovation. I'm proud of the work I produce, like the challenges new projects bring and enjoy the social elements of using Open Source based tools. I'm a regular attendee of PHP London (and its conference in February), Symfony and MySQL meetups.

>KEY SKILLS

Symfony
Wordpress
Joomla! 3
OpenText BIRT

Oracle 11g
MySQL 5.5
SQL Server 2008
Access

Started System 6

MacOS 10.11 [El Capitan]

Node.js
Python
Docker
Android/iOS

PHP
HTML
JS
VBA/ASP

Atom
NetBeans
Eclipse
GitHub

Started Ubuntu 6.06 [Dapper Drake]

Debian/CentOS/Kubuntu/LinuxMint

Started Windows 3.1

Windows 10

World Cuisine
Vinyl
Football
Theatre

>EMPLOYMENT

2008 —   : **Registry Trust Limited, London**
